## Molina Joins Vanderweil Engineers as Manager of Substation Engineering

---

### Executive Brings International Expertise in T&D Engineering, Construction Services

BOSTON, MA (11/4/08) – Andres J. Molina, P.E., an engineer with more than 25 years of experience in electrical power transmission, generation, and renewable energy resource projects, has joined Vanderweil Engineers as manager of substation engineering within the Transmission & Distribution (T&D) Specialty Group. Molina will lead the firm's substation engineering and construction services for projects throughout the U.S. and overseas.

Molina has worked extensively on T&D projects in New England, most recently with the Massachusetts offices of Energy Initiatives Group LLC and National Grid. He holds a Bachelor of Science in electrical engineering and a Master of Science in Business Administration from the Worcester Polytechnic Institute, and a Master of Science in electrical engineering from Northeastern University.

A registered professional engineer, Molina is a member of the International Electrical and Energy Engineers (IEEE) Power & Energy Society.

Vanderweil's T&D Specialty Group provides engineering and construction services for the design of T&D systems up to 765kV. The team's expertise includes route selection, licensing, photogrammetry, structural and cabling design, communication line design, and outdoor substation design. Services include high-voltage systems, civil and structural engineering, vibration analysis, and utility and grid interconnection agreements.

### Vanderweil Engineers

R.G. Vanderweil Engineers, LLP, specializes in mechanical, electrical, and plumbing systems engineering and construction/commissioning support for buildings, central heating and chiller plants, power generation, and transmission and distribution projects. Based in Boston, the 400-employee firm also has offices in Las Vegas, New York, Philadelphia, Princeton and Washington, DC.

Vanderweil Engineers has earned numerous awards for its breakthrough design and consulting services, including the development of advanced strategies for sustainable and energy-efficient systems. The firm was founded in 1950, and is consistently ranked among the top U.S. engineering firms. For more information, visit [www.vanderweil.com](http://www.vanderweil.com).
